

# Jamf Reset

Reimagine wiping and re-provisioning devices

**Jamf Reset is an app designed for IT to empower end-users to securely wipe a device and prepare it for the next user with confidence.**

Temporary use and loaner devices are popular for guests at many different establishments, but prepping them always fell on IT. Hospital guests and hotel visitors want the flexibility of a device they can make their own, without sacrificing the comfort of knowing their data is properly disposed of and erased. This should go beyond browser history to application logins, documents, photos and more. Users want devices to be digitally - and physically - sanitized between uses and Jamf Reset provides a secure re-provisioning process that guides them confidently through a two-step process.

Jamf Pro has simplified shared-use for iOS and iPadOS with Jamf Setup and Jamf Reset. While they can be used separately, Jamf Setup and Jamf Reset are best when paired together to provide end-to-end configuration management that's easy and quick for end users and effortless for IT.

## Here's how **Jamf Reset** reimagines device re-provisioning:

### Simple for end-users

Jamf Reset puts a button to perform a device wipe right on the home screen; much easier than navigating the settings menu.

Paired with other configuration profiles or backgrounds, this option can be made prominent and obvious.

### Increase shared-device confidence

Users will feel more comfortable seeing their private information disappear from a public or shared device.

Organization-specific messaging and branding can be applied to inform users of next steps that might take place outside the device.

### Auditable and MDM driven

Every wipe is tracked so IT knows if or when a device was digitally sanitized. This MDM action is known by Jamf Pro, which puts the device in the ideal state to be redeployed.

### Pairs well with Jamf Setup

To round out the re-provisioning workflow, Jamf Setup offers a pick list of roles that drives automation within Jamf Pro.

**“Jamf Reset clears up the process for us. Employees hand us their device, we run Jamf Reset and we’re done.”**

– Kyle Ericson, True Manufacturing

**Setup and Reset. Rinse and Repeat. 100% over-the-air.**

Simplify device re-provisioning with Jamf Reset, a free companion app to Jamf Pro.
